SPECIALTIES

Project Management, Client and Tenant Relations

PROFESSIONAL EXPERIENCE

As Assistant Project Manager with Compass Commercial Construction Services, Nathan ensures the scope of work is complete on a day-to-day basis. His primary job functions include providing initial project estimating, coordinating jobs for vendors and subcontractors, overseeing job site progress, and preparing cost breakdowns.

Nathan began his construction career in his early 20s after graduating from Central Washington University with a degree in Construction Management and a Minor in Mechanical Engineering and Business. The American Institute of Constructors (AIC) certification increases his knowledge of the construction process allowing him to provide a higher level of service to clients. He brings over five years of experience in both commercial and residential construction to the Compass Commercial Construction team. While Nathan worked as a Project Engineer with Misson Critical Data Center Construction, he completed five data centers in Prineville, Oregon.

Nathan moved to Central Oregon in 2017. He often finds himself immersed in the outdoor lifestyle of Bend hiking, paddle boarding and snowboarding along with his dog and wife.
